

Teardrop Banner Wind Ratings

The standard options for securing Teardrop Banners outdoors are;

It's highly recommended that if using the Hard Ground Cross Base outdoors that it is used in conjunction with the water bag.

The water bag holds up to 9 litres (9kg weight) of water when full.

The wind ratings below are a guide only and a common-sense approach needs to be applied on very windy days.

Teardrop Banner Wind Ratings

Teardrop Banner Size	Hard Ground Cross Base		Hard Ground Cross Base & Water Bag	
	Base Weight	Max Wind Load	Base/Bag Weight	Max Wind Load
2.1mt – Extra Small	3.1kg	45km per hour	12.1kg	88km per hour
2.7mt – Small	3.1kg	35km per hour	12.1kg	68km per hour
3.4mt – Medium	3.1kg	28km per hour	12.1kg	54km per hour
4.3mt – Large	3.9kg	24km per hour	12.9kg	43km per hour

No wind rating is available for the Swivel Ground Stake as it depends on a number of unknown factors including the ground density of the area you are displaying the banners.
